DUAL HOOP ROTATING BASKETBALL TOWER

Dual height hoop system for juniors at 8 ft and senior height 10ft. This rotating system designed and made by HotShot spins 180 degrees to change the hoop in play.

Backboards are HotShot steel 1.2m x 900 perforated to reduce wind resistance and weight, electro galvanised and powder coated finish. Plywood, stainless steel, and glass backboards are also available in the same dimensions.

The bolt on heavy duty hoop is 16mm ring with net clips and powder coated finish and bolts directly on to the top outreach relieving any stress on the backboard.
