

LINE MARKER MAINTENANCE

HotShot Grass-marker - 50 mm wheel transfer unit.

HotShot Grassmarker - 50 mm wheel transfer unit.

Cleaning recommendations for a long life:

- We recommend using HotShot Kombi Klean which is ideal for removing spillages from machinery. Helps keep machines looking new.
- Ensure your machine is cleaned after every use so the paint doesn't clog the wheel system. If wheels become hard to rotate both alloy wheels can be removed cleaned and re greased.
- Remove the small wheel and use a wire brush to clean between the grooves.
- **IMPORTANT:** As you tilt the wheel assembly forward, ensure you lift the paint tray up at the same time. This will allow the tray to disengage from the wheel assembly slot without damaging the tray.
- Our machines are designed to use Pitchmaker FastLine or Blinder line marking paint.
